

OVERVIEW

The Greyfox Home Systems line of integrated multimedia frames combine our decorator frames along with our keystone jacks and connectors. The integrated multimedia frames provide an integrated solution for supplying multimedia connections. The integrated multimedia frames are only available in white.

There are three different configurations of integrated multimedia frames that are available. The F3211-WH is the perfect solution for providing data/phone plus video access while the F3220-WH is designed to provide both data and phone. The F3422-WH is “fully loaded” to cover all multimedia needs.

F3211-WH
